"...The skill of a DJ is not simply in having good songs, but in knowing how and when to play them. Reading a crowd; balancing different speeds and styles, old and new songs; making sure everyone goes home having heard at least some of what they love; making a party "happen"- THIS is what a DJ does. Otherwise, as Kenny (Wetzel) might have said (more colorfully), why hire a dj at all instead of just having a juke box?" ....DJDK
